

Powerful, safe and... persistent! A choice of quality and prestige.

Their power has no rivals!

- The frame has been designed in minute detail. The cutter and the guides are designed for the hardest and most demanding uses.
- All the hydraulic, mechanical and electrical components are of top quality, exclusively produced in the EU.
- They are powerful and safe thanks to the "System-LEADER" controls on all versions.

With the "System-LEADER" controls you can carry out the cutter approach stroke and center the logs while the cutter is in motion with both hands free by using the pedal! Once the log is centered and blocked in the desired position the two control levers are used to split the log.

- The range includes electrical versions (230 Volt single-phase or 400 Volt three-phase), petrol engine VS version, HVP for tractor and the KOMBI versions.

CONTROLS:
Two ergonomically positioned manual controls for the splitting phase.

Rotating board for 67 cm cut.

Wide support board with special anti-slip surface.

Fixed board for 105 cm cut.

Wheels of big dimensions as standard on some models (see technical data sheet).

CONTROLS:
Approved pedal (standard) for approach stroke and log centering.

Note: this illustration represents the Mignon Prof model!

HYDRAULIC VERTICAL LOG SPLITTERS 9 Ton
